

FieldMan

SOLUTION FOR EVERYONE

Company Profile

2026 · Fieldman Solution · Karachi, Pakistan

— INTRODUCTION

Built on site experience, not on brochures

Fieldman Solution is a multidiscipline engineering and construction contractor serving Pakistan's manufacturing and energy sectors. We design, fabricate, erect, test and hand over — covering civil works, electrical and instrumentation, mechanical erection and piping systems — taking the whole scope and carrying the responsibility through to commissioning.

12+

Years in the Field

250+

Projects Delivered

38+

MW of Solar Structures

1.5M+

Safe Man-Hours

Mission, vision & values

Our Mission

To deliver industrial engineering works that are safe, correct and finished on time — removing the coordination risk our clients would otherwise carry themselves.

Our Vision

To be the contractor Pakistani industry calls first when a project cannot afford delay, rework, or an unsafe site.

Our Values

Safety before schedule. Honest measurement and honest pricing. Finish the last ten percent properly. Leave the plant cleaner than we found it.

Three companies, one accountable group

Fieldman is a group of companies bringing engineering, technology and agricultural expertise together under one accountable parent.

Fieldman Solution

Our engineering and construction company — civil, electrical, instrumentation and mechanical works delivered for industrial and energy clients.

Fieldman Tech

Our technology company — IT infrastructure, software and digital solutions supporting clients beyond the plant floor.

Egro Field

Our Egro company — supporting clients with Egro-based work as part of the wider Fieldman Group.

— LEADERSHIP

The people accountable for your project

FieldMan is led by working engineers. Our directors are reachable, and they visit sites.

Imran Asghar

Chief Executive Officer

20 years in the Engineering, Procurement & Construction (EPC) industry. Sets Fieldman Solution's overall strategy, leads major client relationships and holds every project to one standard of quality and safety.

Ali Mustafa

Chief Sales Officer

15+ years in the oil & gas industry across upstream, midstream and downstream operations. Leads business development, client relationships and revenue growth.

Kamran Asghar

Chief Technical Officer

15+ years across sugar, ethanol, cement, power generation and solar. Leads engineering design, project execution, commissioning and quality assurance.

Finance & operations

Khurram Atta

Chief Accounts Officer

14 years of corporate finance experience within the construction and engineering industry. Oversees financial planning, accounts and compliance.

Abdul Muqeet Rajput

General Manager

15+ years managing industrial projects in sugar, ethanol, cement, power generation and textiles. Runs day-to-day execution across all live sites.

— CAPABILITIES

What FieldMan delivers

Each discipline below is staffed, equipped and supervised in-house.

Civil & Structural Works

Solar EPC & PV Structures

Electrical Engineering & Power

Instrumentation & Automation

**Mechanical Engineering &
Fabrication**

Piping & Pipeline Systems

Maintenance & Plant Shutdowns

**One contract.
One accountable team.**

— 01 — CIVIL & STRUCTURAL

Civil & Structural Works

Foundations that hold alignment, slabs that stay flat and drainage that actually drains — set out to survey-grade accuracy.

- ✓ Machine and equipment foundations
- ✓ RCC frames, slabs, beams and columns
- ✓ Industrial flooring, plinths and trenches

— 02 — SOLAR EPC

Solar EPC & PV Mounting Structures

Hot-dip galvanised structures engineered for local wind and seismic loads, matched to the actual roof profile.

- ✓ Structural survey and load assessment
- ✓ Rooftop, shell-roof and ground-mount systems
- ✓ Module mounting and DC cable routing

— 03 — ELECTRICAL

Electrical Engineering & Power Solutions

Complete HV, MV and LV power distribution — designed, installed and commissioned, including solar PV power systems.

- ✓ HV/MV/LV switchgear & power distribution
- ✓ Transformers, generators & motor control
- ✓ Solar PV, hybrid & battery storage systems

— 04 — INSTRUMENTATION

Instrumentation, Automation & Control

Field instrumentation, PLC/DCS and SCADA systems — engineered and commissioned for reliable process control.

- ✓ Flow, level, pressure & temperature instruments
- ✓ PLC/DCS control systems & SCADA/HMI
- ✓ Loop checking, calibration & commissioning

— 05 — MECHANICAL

Mechanical Engineering & Fabrication

Storage tanks, process piping, structural steel and plant equipment — fabricated, erected and maintained by certified crews.

- ✓ Storage tank & pressure vessel fabrication
- ✓ Structural steel fabrication & erection
- ✓ Mechanical erection & plant installation

— 06 — PIPING

Piping & Pipeline Systems

Carbon steel, stainless, HDPE and GI systems — prefabricated, welded, tested and insulated for utility and process duty.

- ✓ Process & utility piping networks
- ✓ Spool prefabrication and shop welding
- ✓ Hydro-testing, flushing and insulation

— 07 — MAINTENANCE

Maintenance & Plant Shutdowns

Planned turnarounds, breakdown response and annual maintenance contracts — mobilised fast, with your production window protected.

— HOW WE WORK

01

Survey & Consultation

As-built conditions and production constraints recorded on site.

02

Engineering & Proposal

Calculations, GA drawings and a BOQ with a firm price and programme.

03

Mobilisation & Execution

Method statements, JSAs, crews on site with daily HSE reporting.

04

Testing & Handover

Inspection, testing, punch-list closure and a documented handover pack.

— HEALTH, SAFETY & ENVIRONMENT

Safety is a condition of work, not a department

Fieldman Solution is committed to conducting all engineering, procurement, fabrication, construction and maintenance activities in a manner that protects our employees, contractors, clients and the public. No project, schedule or commercial objective takes priority over the safety of people and protection of the environment.

1.5M+

Safe Man-Hours

100%

PPE Compliance Target

52+

Toolbox Talks / Year

4+

Site Audits / Month

- ✓ Site-specific Risk Assessments & Job Safety Analysis before every task
- ✓ Permit-to-Work systems for hot work, height, confined space & electrical isolation
- ✓ Any worker may stop unsafe work — without permission, without consequence
- ✓ Documented incident investigation and corrective action
- ✓ Environmental controls: waste segregation, spill prevention, emissions control
- ✓ Regular HSE audits, inspections and continuous improvement

— OUR PRODUCT PARTNERS

Ten brands, one integrated supply chain

We work with established manufacturers so every discipline on a project is backed by equipment we trust.

ValveIT

Industrial valves — ball, butterfly, globe, gate, control & safety valves.

Sealtek

Mechanical seals, gaskets, packings & sealing solutions.

KENDO

Lighting, audio-visual & smart building solutions.

Bänninger (BIR)

Thermoplastic piping systems — PVC-U, PE100, PP-R & more.

CTP Mühendislik

Water cooling towers — package, construction & closed type.

ABB

Electrification, motion & process automation.

Mitsubishi Electric

Factory automation — PLCs, drives & robots.

Supcon

Process instrumentation & automation.

Yokogawa

Process measurement & control systems.

COMPLETE EPC SOLUTION

100 KLPD Distillery Unit Pak Ethanol

A complete EPC solution for a 100 KLPD distillery unit, covering mechanical, electrical, instrumentation, piping, structural fabrication, equipment installation and plant automation.

- ✓ Mechanical equipment supply & installation
- ✓ HV/MV/LV electrical systems
- ✓ PLC/DCS & process automation
- ✓ Testing, commissioning & plant start-up

COMPLETE EPC SOLUTION

65 m³/h Biogas Plant Ethanol Plant

A complete EPC solution for a 65 m³/h biogas plant utilising waste/effluent from the outlet of an ethanol plant, integrated with existing utilities.

- ✓ Biogas digester & associated equipment
- ✓ Electrical power distribution & MCC systems
- ✓ PLC/SCADA-based process automation
- ✓ Integration with existing ethanol plant utilities

COMPLETE EPC SOLUTION

Waste Heat Recovery Boiler Dadu Energy, Dadu

A complete EPC solution for a Waste Heat Recovery Boiler (WHRB), recovering waste heat to produce useful steam and improve overall plant energy efficiency.

- ✓ WHRB engineering & installation
- ✓ Steam & condensate piping systems
- ✓ PLC/DCS-based automation & control
- ✓ Testing, pre-commissioning & commissioning

COMPLETE EPC SOLUTION

900 kW Solar Power System National Foods, Korangi

A 900 kW solar power system delivered on a complete EPC basis — system engineering, procurement, installation, electrical integration, testing and commissioning.

- ✓ Solar PV module supply & installation
- ✓ Grid-tied solar inverter system
- ✓ Earthing & lightning protection system
- ✓ Grid synchronization & plant integration

— OUR CLIENTS

Working inside live industrial plants

Client names are shown by sector; full references and completion certificates are available on request during tender.

Textile & Apparel Group

Food Processing Plant

Cement Manufacturer

Chemical Processing Facility

Pharmaceutical Plant

Beverage Bottling Line

Independent Power Producer

Logistics & Warehousing

Paper & Packaging Mill

Steel Re-Rolling Mill

Six reasons clients keep calling us back

Single-Point Responsibility

One contract and one accountable team across civil, mechanical, electrical and solar scopes.

In-House Engineering

Our own design desk produces structural calculations, GA drawings and BOQs.

Safety Without Compromise

Documented JSAs, toolbox talks, inspected scaffolding and full PPE on every site.

Own Fabrication Facility

Shop fabrication under controlled conditions shortens site time and improves quality.

Certified Welders & Technicians

Qualified to recognised welding procedures with WPS/PQR documentation.

Delivered On Schedule

Baseline programmes, weekly progress reporting and resource loading.

Thank You

Send us a drawing, a photo of the site, or simply describe the problem.
We will tell you honestly whether we are the right contractor for it.
